A Fraud on Wall Street---Commotion Among the Bulls and Bears.

TRICKS OF SPECULATORS.

The Feverishness of the Stock Market Illustrated.

MONEY EASY-GOLD STEADY

Government and Railroad Bonds in Good Demand.

WALL STREET. TUESDAY, Feb. 17-6 P. M.

Wall street to-day was a theatre of much excitement, the cause being the introduction of two iraudulent letters, which were read to the Stock Exchange. One was signed "William Orton, President of the Western Union Telegraph Company," and announced that the capital stock of that company had been increased from \$41,000,000 to \$50,000,000; whereupon that stock dropped from 76% to 73. The other was signed "J. D. Cox, of the Toledo, Wabash and Western Railway Company," and announced that that company would increase its stock from \$15,000,000 to \$25,000,000. The result of this publication was a decline of the stock from 52% to 40%. The two letters for a time produced great excitement, and the market received a start which was carrying it rapidly downward In fact, there were all the symptoms of AN INCIPIENT PANIC,

which were only restrained by letters opportunely received from Mr. Orton, of the Western Union, and Mr. Briggs, the transfer clerk of the Wabash Company, who denounced the letters as forgeries. Great indignation exists in the Stock Board at this successful endeavor in perpetrating a fraud, for it has caused a loss of many hundreds of thousands of dollars, and every effort is being made to discover the chief actor. He is not believed to be a member of the Board, but is supposed to be in some way identified with the person who last summer reported the death of Mr. Vanderbilt, and thereby created a similar commotion in the market. The details of the transaction and the letters will SALES AT THE NEW YORK STOCK EXCHANGE be found elsewhere. The incident is only worthy of study as showing the extremely artificial condition of the market, so often described in these columns. If ten millions surreptitiously added to the "wealth" of a company can break the market and superinduce such weakness as was developed to-day what would be the effect of a real "watering" in the present condition of trade? The event needs no comment. The lesson speaks for itself. The market is carrying all that it can sustain. The attempt to cause depression was infamous, and its author should be severely punished, because for many days hence it will check speculation and create doubt. The recovery in prices was as prompt as their decline, and there was a great rush to buy back the stocks sold on the strength of the forged letters. The following

MONEY closed at 4 and 5 per cent on call. Discounts remain unchanged, aithough confidence in the con-tinued case of the money market is expressed by the willingness of brokers to negotiate paper running into July and August as low as five per cent. Foreign exchange was quiet, the demand and supply being alike limited. Actual business was done at 4.84% for sixty days and 4.87% for demand. Commercial bills are scarce. Continental exchange is dull and without rates.

is firm, the range being between 112% a 112%. The last price was 112%. In this department of the market everything depends on the action of Congress. There may be cliques, but they will effect nothing unless legislation comes to their aid, and additional greenbacks are forced upon the country. It is a bad symptom of national disease when gold thus regulates itself by the public credit. It illustrates what has been so much discussed in this column. The carrying rates paid were 4, 4%, 5 and 3 per cent.
